Review of Previous Meeting's Minutes:

Dress Code: It's on the teachers and administrators to make the call as to whether something is gang attire, not appropriate, etc. There's a lot of wiggle room with the dress code and this could make it difficult on the teachers and admin. If the dress code just says "no hats and bandanas" then you take out a lot of the wiggle room from the dress code.

Clear cut guidelines-if our district is interested in college and career ready then we need to prepare them by expecting them to abide by rules and expectations.

It can become an awkward situation between a male administrator and female students (vice a versa).

Elementary school is where the foundation is established as the students move forward through their education.

We need to make sure that there isn't room in the dress code that will allow for problematic situations.

What statement is being made by what the child is wearing.

The concern of students feeling uncomfortable if they have no control over what they are wearing because their parents are the ones who buy the clothing. The most important thing is to

make sure that the children feel safe and welcome at the school. Not judged by what they are wearing.

We need to make sure the pendulum doesn't swing too far in the generic direction. We need it to be tight enough that it will stand up in court, if by chance a situation went to the extent of a court hearing. The dress code should be viewed as a legal document.

It should be enforced equally across the district. It needs to be the same district wide.

School Attendance Policy:

We had about 47% attendance last week.

Noticing that there are whole families that have had no tardies-so there will be thank you notes sent out to those families.
